

— DIGITAL PASSBOOK FOR LOCAL FINANCE

Run daily, weekly, monthly & adjustment loans — without a paper ledger.

Insofs Finance Management replaces the register and the calculator — track every collection, adjustment and due date from one place, built for how local financiers actually work.

Daily collection financiers

Weekly instalment lenders

Monthly lenders

Interest-only lenders

Multi-town collection teams

1

All four kinds of lending

Daily, weekly, monthly & interest-only adjustment loans — one system, no separate register for each.

2

The arithmetic does itself

Enter amount, interest & doc charges — instalment, end date and total repayable are worked out for you.

3

Run sheet on a phone

Pick the town and the day — your agent opens the list on any phone browser, nothing to install.

4

Reports for your auditor

Outstanding loans, collections, cash flow, bad debt, yearly P&L & trial balance — printable and Excel-ready.

5

WhatsApp reminders in Telugu

One tap opens WhatsApp with the reminder already typed — name, balance, months overdue — in Telugu & English.

6

Photograph the Aadhar card

Name, number & address fill themselves in from a photo. One Aadhar can never be registered twice.

- **Telugu on every screen**

Menus & buttons switch to Telugu — saved per person.

- **Interest the way you quote it**

Rupees per hundred, per month — exactly as said at the counter.

- **Your towns, your collection days**

Multiple towns, one login — each agent sees only their own town.

— SEE IT WORKING

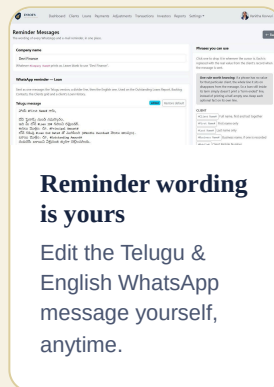

Real screens, not drawings.

Three screens from a system running a real finance business today.

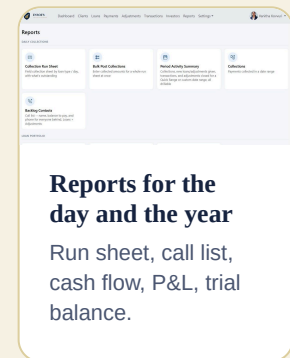

Giving a loan

Three numbers in — instalment, end date and total repayable fill themselves.

Reminder wording is yours

Edit the Telugu & English WhatsApp message yourself, anytime.

Reports for the day and the year

Run sheet, call list, cash flow, P&L, trial balance.

— HOW IT WORKS

Four steps, same as your paper ledger — just faster.

01

Open the account

Add the borrower in one form — photograph their Aadhar card and most of it fills itself in.

02

Record the collection

Daily, weekly or monthly — you or your agent enters the payment on the spot.

03

Let it calculate

Interest, adjustments and running balance update automatically.

04

Track and follow up

Reports show who is behind; one tap sends a WhatsApp reminder in Telugu.

— PRICING

One flat setup, one small yearly renewal.

No per-transaction charges, no hidden slabs.

Software fee (one-time) **₹25,000**

Configuration fee (one-time) **₹5,000**

Total to get started ₹30,000

Annual renewal (domain, hosting, service) **₹4,000/yr**
